

Beltone. Helping the world hear better.

Beltone was founded on the act of helping a friend enjoy life more. Since 1940, we have provided the innovation, knowledge, tools, service and training to our professionals servicing those with hearing loss. Beltone makes quality hearing care available across North America. We develop technically optimal hearing solutions without ever losing focus on the individual's needs. It is our belief that no individual should be denied the possibility of an improved life with better hearing.

The **power** to be free

Introducing the most complete
hearing care experience

Beltone **Boost Max**™

 **Beltone**™

Made for
iPod iPhone iPad

The power

Beltone Boost Max delivers the most

The power of clear sound

Beltone Boost Max™

Beltone Boost Max is the newest, most advanced hearing aid for severe-to-profound hearing loss. Boost Max was designed using Beltone's latest groundbreaking hearing technology found in Beltone Trust™. It offers powerful amplification, unrivaled sound quality and seamless connectivity and remote support.

The power of seamless connectivity

Beltone Direct Line™ wireless accessories

Stay conveniently connected to all of your favorite devices – and get that extra boost you may sometimes need – without any devices around your neck.

complete hearing care experience

The power of full support – wherever you are

Beltone Remote Care™

After your initial fitting at the clinic, Beltone Remote Care technology gives you access to extra support and personal fine-tunings from your hearing care professional, no matter where you are. It means you can go wherever life's everyday adventures may take you – and still stay in control of your hearing. It's the ultimate in hearing convenience.

The power of complete control

Beltone HearMax™ app

The Beltone HearMax app lets you easily control your hearing aids from your iPhone®, iPad®, iPod® touch or most Android devices. You can take advantage of excellent adjustment features, and receive extra care and fine-tunings on the go. It's as easy as checking your phone messages.

The **power** of **clear** sound

What would you say is your toughest hearing challenge? According to studies, the number one challenge for people with severe-to-profound hearing loss is hearing speech in noisy environments. With a range of superior sound processing features that enhance speech clarity, Beltone Boost Max is designed for the most challenging listening situations – and can be tailored to your specific needs.

With Beltone Boost Max you will get:

60% More clarity of the sounds around you*

60% Better speech understanding in noise**

*compared to binaural beamforming in hearing aids for severe-to-profound hearing loss. Effect of directional strategy on audibility of sounds in the environment. Jespersen C, Kirkwood B, Groth J, 2017).

**with Crosslink Directionality 2 compared to omnidirectional. (Data on file).

No more distortion

Feedback Eraser removes the whistling and buzzing of feedback, so you can feel comfortable and confident all day long.

A richer listening experience

CrossLink Directionality 2 automatically adjusts settings, so you can catch that funny side comment the first time and still hear background sounds that might be important. At the same time, Personal Sound ID creates better sound quality and the ability to locate sounds naturally. This combination lets you focus on speech without losing the ambient sounds that enrich your listening experience.

A fuller sound spectrum

Having trouble hearing high-pitched sounds such as children's voices or birds chirping? Sound Shifter enables these sounds to come through, so you can enjoy a fuller sound spectrum.

The **power** of complete control

Made for iPhone direct audio streaming

Beltone Boost Max's Made for iPhone integration lets you stream sound directly from your iPhone, iPad or iPod touch to your hearing aids without having to wear any sort of adapter around your neck. Using this robust wireless technology, you can clearly hear voices over the phone, listen to your favorite music and more – all through your Beltone Boost Max hearing aids.

A powerful communication tool

Have you found video chat technologies to be helpful communication tools? A study found that using direct streaming and FaceTime for phone conversations provide an average of 70% better speech understanding than using an acoustic phone. This can make the difference between successful phone use and no phone use at all.

70% Better speech understanding using FaceTime*

Beltone Direct Line wireless accessories

A recent survey shows that users of hearing aid solutions that include wireless accessories are 94% satisfied, which is significantly higher than users who do not use wireless accessories.

94% User satisfaction with wireless accessories**

Beltone Direct Line wireless accessories stream sound directly to Beltone Boost Max, keeping you conveniently connected to all of your favorite communication and entertainment technologies. Choose from a range of wireless accessories that can offer that extra boost you may sometimes need.

The **power** of **full support** – wherever you are

Now, wherever you are in the world – at a busy supermarket in town, on a trip to the country or traveling overseas, you can rely on extra support and fine-tunings from your hearing care professional. Our free Beltone HearMax app and new Remote Care technology make this possible.

The free Beltone HearMax app

The Beltone HearMax app is the most advanced app for hearing aid users. You can control volume, adjust programs, noise reduction, speech focus and more – directly from your iPhone, iPad, iPod touch, Apple Watch or most Android devices. Simply download the app for free from the App Store or Google Play.

Beltone Remote Care support and fine-tunings

Our groundbreaking Remote Care technology has made your support options even more convenient. Now you can request and receive fine-tunings in between your scheduled hearing care appointments, without having to make extra trips to the clinic. Once you have downloaded the Beltone HearMax app, you can send your requests through the app to your hearing care professional. When the fine-tunings are completed, you get a notification in your app, and you can download them and start using your new settings wherever you are.

Ultimate **power** in one **complete** hearing experience

With Beltone Boost Max, you can feel confident, more safe and in control, whether you are looking to add extra convenience and functionality to your daily life or aiming to empower yourself for bigger adventures.

Comfort counts

Ergonomically designed to tuck nicely behind the ear, Beltone Boost Max is comfortable to wear and available in a range of colors – so there's one to match your individual need, preference and style. You can also have your Beltone Boost Max programmed to include the quick volume and power control function, which lets you instantly reduce volume or power in just a touch.

Built to endure

Beltone Boost Max hearing aids are protected inside and out with HPF⁸⁰ NanoBlock™, a special coating that provides maximum protection against moisture and debris. And with up to 12 days of battery life*, you can stay in control of your hearing – worry free – for longer.

The power to be free

Designed specifically for people with severe-to-profound hearing loss, Beltone Boost Max offers powerful amplification, excellent sound quality in any environment, seamless connectivity and remote support. It all adds up to the most complete hearing care experience – and the power to be free.

*Up to four hours of streaming per day
